Swing Gate MR100 ADA Stainless

Mid-Range Value • Classic design • One or two way swing • Fixed ADA size

SwingGate MR100
(36" ADA opening)

Applications:

Handicap gates provide authorized access for easy entry and/or exit. They restrict traffic, provide handicap accessibility, and are frequently used as an access point for hand trucks, carts, and deliveries. Popular applications also include retail stores, schools, libraries, cafeterias, and health club facilities where inexpensive reliable security is required. Our SwingGate cabinet style models are designed to be paired with our matching turnstiles and can be configured to offer different levels of functionality based upon your needs and budget.

Cabinet style gates offer greater versatility and configuration options than conventional post style gates. Besides their matching appearance, their solid wall construction gives them enhanced rigidity and also offers a variety of access control options.

The MR100 ADA is our mid-range cabinet style self-closing gate with a stainless finish, classic rectangular design, and a double wall cabinet that is durable and built tough for long lasting reliable performance.

All MR100 ADA models include a self-closing heavy-duty hinge, a full size 36" clear ADA opening for handicap access, and either a one way 90 degree swing, or two-way 180 degree swing.

Available options include: an electric magnetic strike lock (integrates with access control systems), and push-button activation (momentary or timer).

About Hayward Turnstiles:

Hayward Turnstiles has over 50 years of expertise in quality manufacturing of precision aircraft parts and reliable turnstiles.

Our factory, in Milford, CT, is AS9100 Certified to aerospace standards resulting in superior turnstiles.
