

HTG-M FULL HEIGHT ADA GATE

At Hayward, we understand that every facility needs an accessible entrance, but not every project requires a premium automatic gate. The HTG-M ADA Gate is designed to deliver dependable accessibility in a simple, cost effective package that installs quickly and performs reliably.

When you choose the HTG-M, you're investing in a practical solution that helps you meet ADA and emergency egress requirements without adding unnecessary complexity or expense. Whether you're outfitting a new entrance, upgrading an existing facility, or adding an accessible companion gate to your turnstile installation, the HTG-M provides the reliability, ease of installation, and long term value you need to keep your project moving forward.

**USA
MADE**

- 
- ✔ Electric Strike, Panic Bar, Door Closer, and Key Lock All Included Standard

(Shown in Galvanized Finish)

Dependable Construction and Operation

- Vertical steel bars coupled with steel mesh infill keep unauthorized entrants out and prevent reach through and tampering
- Can be used mechanically with included key lock or electronically with included electric strike lock
- Fully welded exterior components that meet ASTM standards
- UL approved electric components

Great For

- ADA compliant accessible entrances
- Handicap access alongside turnstiles
- Perimeter access control in fence lines
- Delivery entrance at secure access points
- Emergency egress code compliance

Typically Found At

- Distribution centers
- Data centers/server farms
- Secured government and military facilities
- Manufacturing plants
- Corporate facilities

Systems Integration

- I/O (dry contact) integration with electric strike makes integrating access control and fire safety systems a breeze
- Easily integrates with fire and life safety systems

Available Finishes

- Hot dipped galvanized steel (indoor or outdoor use)
- Powder coat over raw steel (indoor use)
 - Choice of 2 colors per turnstile
- Powder coat over galvanized steel (indoor or outdoor use)
 - Choice of 2 colors per turnstile

Operating Modes

- Access control: included electric strike makes entry via cards, proximity readers, and other forms of credentials a breeze
- Emergency egress: included panic bar perfect for emergency egress
- Keyed entry: can be used with included key (great for if electricity is not available at the install site)

Optional Addons

- Card reader mounting plates
- Kick plate (for compliance in certain states)
- Push buttons
- Reach prevention panels (when used alongside turnstiles)
- 85dB panic bar alarm
- Mounting bracket kit for affixing gates to neighboring turnstiles
- Header addon to increase total height by 2" to match height of competitors' turnstiles

Power Supply Specs

UL Approved Monitored Electronic Strike: 24VDC Input Voltage
Current Draw: 170 mA

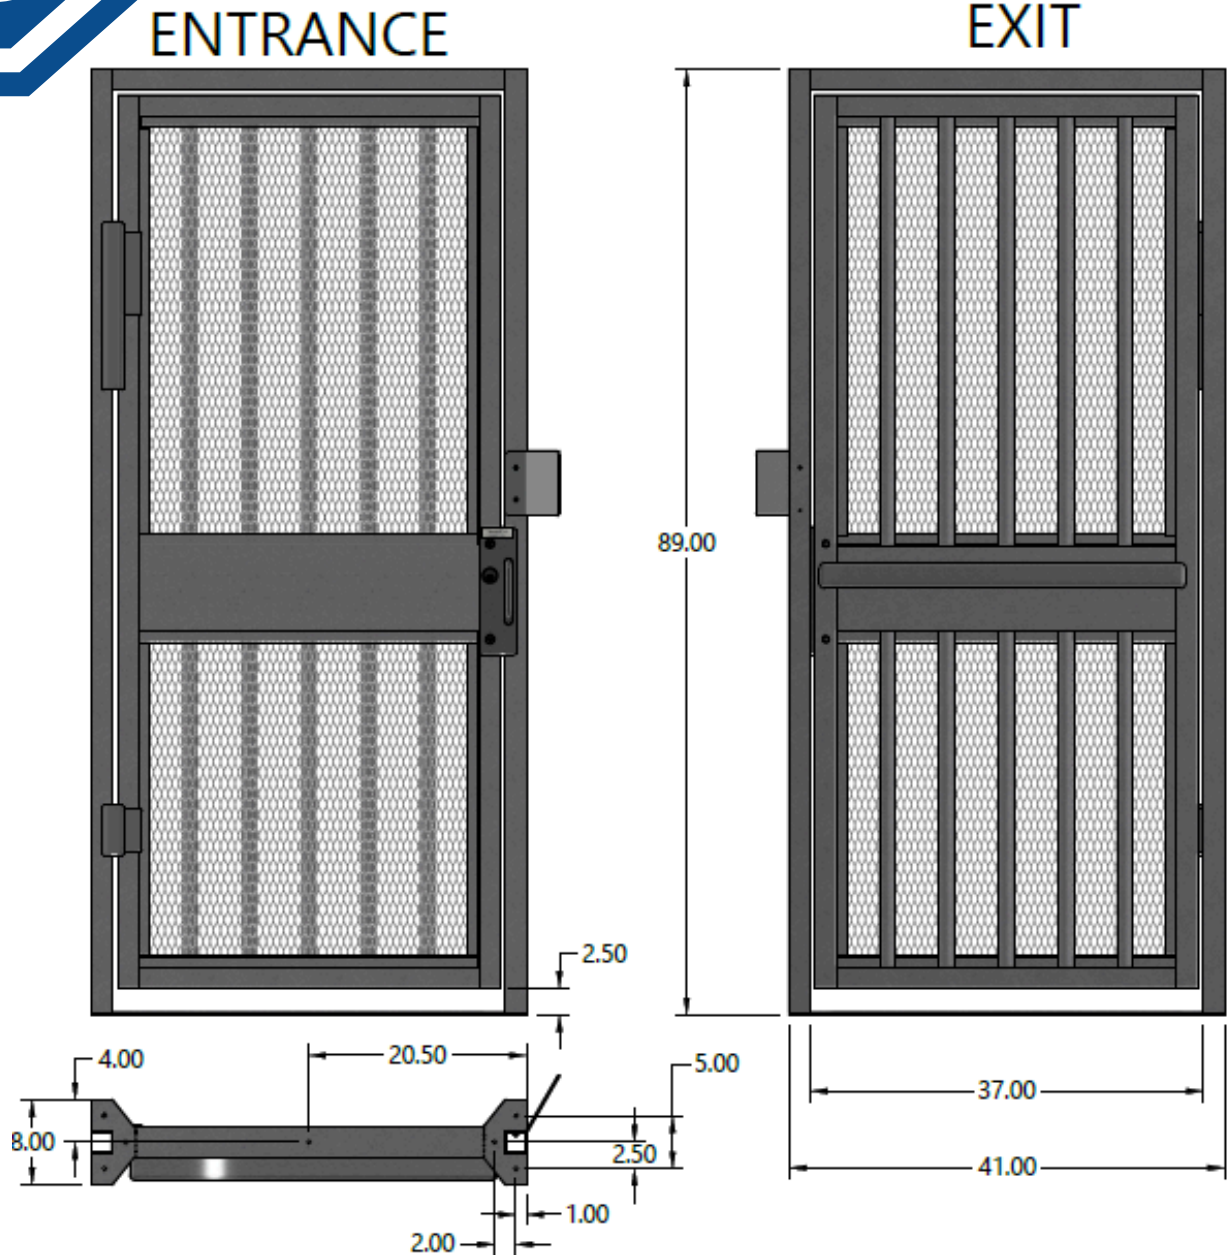

*All components UL recognized

Warranty: 1-Year Limited Warranty
